

## Course Aim:

To equip participants with the professional knowledge and competencies to apply security consulting to their in-house roles and responsibilities, for the enhancement of security for the greater community.

## Course Benefits:

- Apply and consult in-house
- Learn directly from security practitioners
- 7 Comprehensive modules for an in-depth understanding of Security Consulting.

*As this is a highly-rated program conducted by true practitioners with schedule constraints, only 1 intake is possible each year.*

*We strongly urge all interested parties to reserve their seats as soon as possible.*

Course Duration: 5 days

## Essential Toolkit for Security Professionals In the Business World

***Enhance your in-house role with both the helicopter and detailed view  
of the Security Consultant.***

### If you are asking:

- What lies beyond conventional managing? Where do I go from here?
- How can I enhance my role and responsibilities in my organization?
- How can I apply the knowledge of professional security consultants to aid me in securing my organization more effectively?

100%

*"The course has effectively achieved its learning objectives and I have benefited from it."*

*"Overall, the course was well-presented and useful for my job."*

*"I would recommend this course to others."*

### The Executive Program will answer all your above questions and more:

- Gain the helicopter and detailed perspectives of professional security consultants
- Acquire the competencies to practice in-house security consulting for your organization
- Walk through the various stages of professional consulting step by step, and in detail
- Sharpen your strategic skills with a case study-driven exercise that will call for application of the knowledge acquired over the 5-day course
- Network and learn from fellow security executives from leading industry organizations

### Specially designed for:

- Security Heads
- Facility Managers/ Operations Managers
- Personnel overseeing sensitive project management of new developments (government/ commercial/ industrial natures)
- Personnel involved in facility planning and security of **at least Supervisory and Managerial levels**

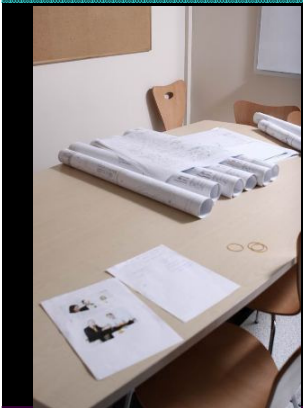

"I'm very pleased to have joined your Executive Program. Currently, I'm preparing my risk analysis and it helps me a lot. Although it's only at the beginning stage, I can feel the challenge ahead. However, after attending this course, I'm confident that I can go through it."

"Attending this Executive Program has provided me with the in-depth knowledge and techniques used by Security consultants, including the structured methodology in conducting security surveys and analysis of security threats and vulnerabilities."

"Thanks a lot to CK and his training team that has given me a better perspective of a CSO, especially for the Risk Analysis. I'm looking forward to getting the appointment of CSO at the end of this year."

"This program has also given me an insight of the various security mitigations and countermeasures that can be adopted, including the security equipment and electronic security devices that can be used to complement the protection of any given facility."
