Facility Security Management [HLST 010]

Providing Strategic Security Solutions

Facility Security is increasingly becoming the must-have for various businesses and operations all over the world. As we become more conscious of threats in today's environment, being prepared in Facility Security serves as the fundamental strategy in maintaining the everyday peace of mind as well as allowing quick response to emergencies. Involving optimum use of both personnel and technology, the people who are in charge of their facility's security need to be mindful of the various aspects, and what it takes for a security that is holistic.

Course Synopsis:

Beginning with the concept of security management, this course teaches participants tactical security procedures that provide them the know-how of protecting a facility via operational approaches and technological means. Towards the end of the course, participants will also be equipped with the knowledge and skills of putting fire hazards under control and the technique of putting up security audit and contingency plans which can be put in place to safeguard lives and properties within a facility or building.

Course Benefits:

1. Gain a firm grounding in the various approaches to facility security
2. Find the best balance between the objectives of Fire Safety, and Security Management
3. Master Security Audit as a tool to conduct healthchecks on your facility
4. Be prepared for the "What-if's" - Equip your facility with sound contingency plans

Course Aim:

To provide participants with the knowledge and know-how to manage security and fire protection on a facility.

Essential For:

Chief Security Officers, Security Manager, Property Manager, Building Manager, Facility Manager and personnel involved in security management of a facility or building.

Certification:

Upon successful completion of the course, participants will be awarded:
Certificate of Completion.

Course Duration: 3 days
