

## **Singapore Protective Technologies Consortium (SPTC)**

### **Background**

The **Singapore Protective Technologies Consortium (SPTC)** is formed on 6<sup>th</sup> Feb 2007 under the sponsorship of the Singapore government through its administering organization called the International Enterprise Singapore (ieSingapore).

### **Aim and Objective**

The consortium aims to provide a holistic approach to protective design and technologies by banding together the 5 top protective and security technologies companies in Singapore with related expertise to present a whole value chain to serve the security and protection needs of international clients.

The security threats facing a company, an institution, or a facility, have grown with the global threat of terrorism. No country is immune and governments and corporations are increasingly taking it as a norm to protect their assets against new threats like bomb blasts and bio-chemical attacks. The protective expertise offered by this consortium will help clients calibrate the level of protection vis-à-vis their other requirements of budget, maintaining a friendly face to attract business, business continuity, etc. This consortium will band together expertise, consolidate market information and get ready a joint capability to deliver to overseas clients.

### **Alliance Companies**

The 5 top Singapore protective and security technologies companies forming the SPTC alliance are CPG Consultants Pte Ltd, K&C Protective Technologies Pte Ltd (KCPT), CISCO Security Pte Ltd and AETOS Security Management Pte Ltd and STET Homeland Security.

## Conclusion

Each of the companies has different strengths in the security protective solutions industry. By pooling the expertise and track records of the different companies, a one-stop integrated expertise is on offer to potential clients in a range of industries.

Singapore Protective Technologies Consortium's MOU Signing Ceremony.

A new alliance "Singapore Protective Technologies Consortium" is officially formed.
