

STET Homeland Security Services Set to Further Leverage on Focused Branding

Strategic foresight and technology at the forefront

STET Homeland Security Services Pte Ltd (STET HLS) was incorporated as a full-fledged security consultancy and solutions provider on 8 March 2009. With the name reflecting industry and core expertise of the company, STET HLS is poised to strengthen its presence in the region.

A Dynamic Company

In October 2007, STET HLS (under STET) was showcased by Zawya.com, a Middle East business news website, as exemplary of a successful international firm in the Middle East market. Factors such as first-mover advantage, hard work and strong local reputation have been demonstrated by STET HLS as its key factors of success.

Milestones

The birth of STET HLS as a subsidiary of STET is due in a large part to the professionalism, dedication and tenacity of its team, who had captured numerous milestone achievements. Consultancy projects for local key facilities include a state-of-the-art hospital and the four newest oil and gas terminals in Singapore, while overseas projects include highly-specialized medical facilities in Qatar; and two key financial institutes in Oman.

Harnessing the core competencies of the ST Electronics group, STET HLS has also collaborated with ST Electronics (Info-Software Systems) and ST Electronics (Info-Comm Systems) to provide security consultancy services for iconic national projects in Singapore.

Looking Forward

Challenges and opportunities exist in both good and bad economic times. STET HLS fully subscribes the tenet of not resting on one's laurels but to build on its strong foundation to move on from strength to strength. From security master planning to solutions and security training, the company will champion on with professional expertise, conduct, good business governance and ethics, supported by robust teams of consultants to meet its customers' needs.
